We've Got To Stop (Meeting Like This)

Teena Marie

You know, baby We go back a long way But it hasn't always been easy You know I mean, you living on the east coast And me living on the west coast It's tearing me apart We've got to stop meeting like this

Try to understand When I say how much I care It hurts me so inside each time we say goodbye And it's so unfair

And I've cried, yes, I've cried As I face my calendar I mark red Xs off and with each tear that drops Baby, it gets harder to bear

'Cause your love could send a rocket up to the moon Your love hit me just like a lead balloon So let's make a wish, seal it with a kiss, my baby You know we've got to stop meeting like this

Try to understand Our long-distance love affair Has gotten out of hand, it's more than I can stand Ooh... girl, this I swear

And it hurts, yes, it hurts Baby, as I face my calendar I mark red Xs off and with each tear that drops Baby, it gets harder to bear

Your love could send a rocket up to the moon Your love hit me just like a lead balloon So let's make a wish, seal it with a kiss, my baby, yeah You know we've got to stop meeting like this

Can you find a way to say goodbye Without really saying goodbye Can you make it easier on me Can you stop these tears I cry Baby, I can only try Can you find a reason why Love shouldn't die

I hear what you're saying And my love will be waiting I hear what you're saying And my love will be here After your other lovers fall If you'll only stop meeting like this... baby

(You know we've got to stop, my love) This hurting in our hearts, my love (I've been blind) So blind (So blind) (You know we've got to stop it, baby) (Woo... ooh... ooh... ooh...)

You know we've got to stop, my baby I've been goin' crazy Out of my mind Time after time... yeah... hey... baby
