Without You

Teenage Bottlerocket

Remember when you slept so close to me at night
I felt you breathe you fit into my arms just right
I never meant to hurt you
Cause I know that you've been hurt before
It's hard when everything around reminds me of you
I still miss your eyes your smile and all of your tattoos
And those nights we talked for hours on the phone
But now you're gone and I feel so all alone here without you
Remember when you showed me all your favorite tunes
And then we kissed the softest kisses in your room
I know you never meant to hurt me
But you tore my world in two
It's hard when everything around reminds me of you
I still miss your eyes your smile and all of your tattoos
And those nights we talked for hours on the phone
But now you're gone and I feel so all alone here without you
