Only With You

Teenage Fanclub

So much that I want to do Only with you Vistas that I want to view Only with you

I found myself in time Was nothing I knew about it I travelled a straight line While living without you Experience made me climb Was nothing to do about it But you were on my mind While living without you

Beauty and truth fill my view Only with you Naivety of youth sounds so true Only with you

I found myself in time Was nothing I knew about it I travelled a straight line While living without you Experience made me climb Was nothing to do about it But you were on my mind While living without you

I found myself in time Was nothing I knew about it I travelled a straight line While living without you Experience made me climb Was nothing to do about it But you were on my mind While living without you

Only with you Only with you Only with you
