

Come On Kids

Tegan and Sara

We were so high
We thought we definitely died
'Cause we were dead already, dying

Endless nights took on my whole life
Or so I thought
It turns out that all your friends
They were just mean, dressed up

So come on kids, eat those pills
You got your whole life to lose
We've got so many friends
That wear their feet too big for their shoes
We've got cities to visit
We've got trees we've yet to live in
So get yourself on top of me
Before I'm gone, gone, gone

We were so young
I thought that acting old
Would give me all your love
Give me all you've got

So come on kids, eat those pills
You got your whole life to lose
And we've got so many friends
That wear their feet too big for their shoes
We've got cities to visit
We've got trees we've yet to live in
So get yourself on top of me
Before I'm gone, gone, gone

And all night long on your front lawn
You built me a neon village
And you said, "Bring on new diseases
If they're good for you, then they're good for me"
Yeah, if it's good for you, then it's good for me
If it's good for you, then it's good for me

So come on kids, eat those pills
You got your whole life to lose
And we've got so many friends
That wear their feet too big for their shoes
We've got cities to visit
We've got trees we've yet to live in
So get yourself on top of me
Before I'm gone, gone, gone

And we've got so many friends
That wear their feet too big for their shoes
We've got so many friends
That wear their feet too big for their shoes
We've got so many friends
That wear their feet too big for their shoes
We've got so many friends
That wear their feet too big for their shoes
