

## You Turn Clear In The Sun

Telekinesis

We fell in love this summer  
By the spring time we were done  
Is it any wonder that I didn't run?  
No math equations  
Could tell you what went wrong  
I could see straight through you  
You turn clear in the sun  
Let's start all over, let's go back to square one  
I never loved you, I've never loved anyone  
And I could sit and wonder  
About where I went wrong  
I can go out Friday and try to have fun

You say nothing and I know it's true  
You say nothing and it comes right back to you  
I hope he treats you better, I hope that he'll take you out  
I hope he supports you when there's no one around  
I guess I'm gone forever, I guess I moved to a new town  
So I won't forget you, I'm writing it down  
You say nothing and I know it's true  
You say nothing and it comes right back to you  
Was it you or was it me?  
Was it you or was it me?  
Was it you or was it me?  
Was it you or was it me?
