

Little White Lie

Temposhark

Meet me at the after show
I'll be waiting with the keys to my hotel
Last night, unforgettable
No one betters the way that you swallow me whole

Don't believe everything you read
Yes, I'm married but I've left my wife at home

A little white lie never hurt anyone
A little white lie never hurt anyone
A little white lie turns into another
Little white lie, shall I tell another?

Lately I've not said a word
In avoidance of any argument
Become a stranger in my own front room
I can't find her so tell me where has the old you gone?

Don't believe everything you hear
It's you I married! I could never wreck our home

A little white lie never hurt anyone
A little white lie never hurt anyone
A little white lie turns into another
Little white lie, shall I tell another?

Don't believe everything you read
Yes, I'm married but I've left my wife at home

A little white lie never hurt anyone
A little white lie never hurt anyone
A little white lie turns into another
Little white lie, shall I tell another?

I'll be home soon, I'll be home soon
