

## It's Not Me

### Ten Foot Pole

You took my closest friends  
Split my family  
I gave up everything I had  
Except your memory but I know  
Someone will hold your hand tonight  
You won't remember me tonight  
I wish I could forget so easily  
Someone will hold your hand tonight  
Someone will sleep right by your side  
All I know is it's not me

I miss your piercing glare  
I miss your fearless touch  
All the little things  
I never thought would mean so much  
And after all this time  
I thought we would forgive  
I guess there is no turning back  
You have your life to live I'm here all by myself  
Remembering that you once said that  
You would always be here "wait and see"  
Someone will hold your hand tonight  
You won't remember me tonight  
I wish I could forget so easily  
Someone could hold your hand tonight  
Someone could sleep right by your side  
All I know is it's not me
