

Last of The Lovers

Ten

Lonely is the night for the lost ones,
Heavy is the cross to bear,
Love is the shrine, die upon it
Falling from the skies like a love bomb
Telling' you do not despair
Hope is alive if you want it,

I'll bring you love in the colours of autumn
I'll keep you warm, till winter has gone,
I will be there through the springtime that follows,
I will love you all summer long

We're lookin' down the barrel of a gun
We're the last of the lovers
Now we stand to testify, this crime is done
Undercover of the night
I don't wanna face the time to come
Live and die like the others
I don't wanna taste the spineless lies to come
Tonight, We're the last of the lovers

Shattered by the sound of the thunder
Echoed in the dark despair
Fight for the rights cast asunder
But something in the light makes you wonder,
Cuttin' through the dress she wears,
Unchains the might of the hunger

I'll bring you love in the colours of autumn
I'll keep you warm, till winter has gone,
I will be there through the springtime that follows,
I will love you all summer long

We're lookin' down the barrel of a gun
We're the last of the lovers
Now we stand to testify, this crime is done
Undercover of the night
I don't wanna face the time to come
Live and die like the others
I don't wanna taste the spineless lies to come
Tonight, We're the last of the love
