

# You Do All Things Well

Tenth Avenue North

Father in Heaven, hear this simple prayer  
Get us through the night and fill up our despair  
Pain has come and taught us to fear  
We're gonna need some grace now to fill the air  
'Cause in the twilight, we need eyes to see  
How You're working beauty even out of ugly things

You do all things  
You do all things  
You do all things well  
You do all things  
You do all things  
You do all things well

Father, among us, keep us in Your arms  
There's evil all around us and we're trying to hold on  
Just to know that You're still good  
And that Your love is alive  
Oh, let us cling to Jesus and sing tonight

You do all things  
You do all things  
You do all things well  
You do all things  
You do all things  
You do all things well

You break me to bind me  
You hurt me, Lord, to heal me  
You cut me to touch me  
You died to revive me  
You break me to bind me  
You hurt me, Lord, to heal me  
You cut me to touch me  
You died to revive me

You do all things  
You do all things  
You do all things well  
Father, You do  
You do all things  
You do all things  
You do all things well  
You do all things  
You do all things  
You do all things well
