

## ...and They Will Never Know

Terence Trent D'Arby

On a starry island On the scented sea sands With my lover morning  
And they will never know and How you came to me and Kissed me  
e passionately and Said don't let it show and And they will never  
er know and

We are getting stronger And we want the world to know We are getting  
bolder And we've got to let it show And they must never know and  
How I love you so and How we rendezvous and Do what no-one else  
can How you take my free hand and Say it will forever stand But we  
must take it slow and And they will never know and

We are getting stronger And we want the world to know We are getting  
freer And we've got let it show When you were a sister Of loneliness  
in Sivaville No Goobers no Raisinettes No Miracles no Marvelettes  
When I was a solo boy

I breathed into the atmosphere My yearning for a woman Now I collapse  
into your smile Om Nameh Sivayeh Om my darling!

On a starry island On the scented sea sands With my lover morning  
And they will never know and How you came to me and Kissed me  
e passionately and Said don't let it show and And they will never  
know and
