

Stay Free

Terror

We never asked you for much
But still you threw us all away
Test me, judge me, I'll laugh in your face
I learned long ago not to give a fuck what you say

Stay free, I'll stay free
You don't know me, how can you judge
My fucking life and I'll always stay free

Just dead end kids from the wrong side of fate
Our eyes tell a story of struggle and pain
You're my fucked up family now
And I value all the love that I found

Stay free
Don't let them take all your hopes and your dreams
Stay free

I'm living, learning, growing and changing
Just to find what this all means
You find strength in what you hold in your hands
That's not for me, I'll stay free

Crossed every border to every corner
Of every city, what did I see?
So many out there just like me
The true believers that will always and forever
Stay free
