

## Fire

Tesla Boy

Late, late going out tonight  
It's the fire in your eyes calls  
Wait, what makes you glow so bright?  
It's the fire in your eyes  
Your soul's paying for lack of ice

And you say you played it right  
And going out in the night  
While I'm whispering your name  
Burnt out and dried  
Your image wiped  
Washed out like a morning tide  
There's only fire in your eyes  
Fire in your eyes

Talk, talk to me all the night  
It's the poison in your tongue makes  
Way to the cold knives I mouth  
There's no reason to resist  
Till I can reach your lips

And you say you played it right  
And going out in the night  
While I'm whispering your name  
Burnt out and dried  
Your image wiped  
Washed out like a morning tide  
There's only fire in your eyes  
Fire in your eyes
