

Burnout to Fade

Tesla

It all became what it's become
No turning back, what's done is done
So I took it on
Step by step, one by one
Cause some are lost and some are won
And do you recall?
The way I used to call your name
And how you never ever came
Now suddenly here you come
But it's to late
No chance for me
You can't except
Or can't believe, no need to wait
Cause I moved on
I'm better here, just let it be
Burn out to fade...
It fades away
Looking back to yesterday
When we were young, so unafraid
So I took it on
And had to choose the choice you made
They took it all and ran away
Do you recall?
The way I used to call your name
And how you never ever came
Now suddenly here you are
But it's to late
No chance for me
You can't accept
Or can't believe, no need to wait
Cause I moved on
So better here, just let it be
Burn out to fade...
Burn out to fade...
The way I used to call your name
And how you never ever came
Now suddenly here you come

But it's to late
No chance for me
You can't accept
Or can't believe, no need to wait
Cause I moved on
Now better here, just let it be
Burn out to fade...
It fades away...
It fades away...
It fades away...
Just go away...
Go away
