

Everything that's known to man  
Got it right here in the palm of my hand  
It's all a part of the master plan  
One push of a button and you'll understand  
All you get is the information  
Censoring the situation  
Oh my God it's taking me  
From the phonograph record to the MP3  
All the world is overrun with Technology  
Oh my God it seems to me  
We've gotta get back to Simplicity  
All the world's out of touch with reality  
I can't believe  
Honest values of family  
Come straight from the heart  
Like the blood we bleed  
And Reachin' out to a friend in need  
Means more than a text from a cell phone screen  
All these sounds of complication.  
In the cloud communication.  
Oh my God it's taking me  
From the phonograph record to the MP3  
All the world is overrun with Technology  
Oh my God it seems to me  
We gotta get back to Simplicity  
All the world is outta touch with reality  
It's plain to see  
Rewind Now!  
Oh my God it's taking me  
From the phonograph record to the MP3  
All the world is overrun with Technology  
Oh my God it seems to me  
We gotta get back to Simplicity  
All the world is outta touch with reality  
I Can't believe, MP3
