

## The Game

Tesla

World's gone mad  
Hey the world's on fire  
Food's too dear and your gas is higher  
Got to eat, and you've got to breathe  
Got no money, well, it's time to leave

Dow Jones crashes, the cats get rich  
See them laughing

It's a game (big game)  
It's just a game (a big game)

Profit's in hey, what's going on?  
All this time, it's the same old song  
If you've got dough, they'll lend you more  
When you're broke, you get shown the door  
They'll take your home and they'll take your car  
Make you live in your mom's backyard

The rich get rich, then get rich some more  
Pretty soon, they'll be all at war

It's a game (big game)  
It's just a game (a big game)  
So who's to blame?  
It's just a game

Playin games with people's lives  
Who struggle hard just to survive  
The world is goin' up in flames  
it's just a game
