Three Days in Darkness

Testament

In a world polluted inside let's pretend the nightmare is done from the earth the magma will rise From the sea comes cancerous tides The meaning of life ends in prophecy Premonitions bring tragedy is the hope for humanity

Molten fire.. flies thru the sky Burning high... eclipse of the sun Blackened skies Rites of the night The days in darkness in 2012

Mother earth's been withered by time Already dead and we didn't even know it Watch the stars to give us a sign From above, all the angels descend The meaning of life ends in agony Raped by impurites Not chance for humanity

Molten fire.. flies thru the sky Burning high... eclipse of the sun Blackened skies Rites of the night The days in darkness in 2012

Magma splits the earth and shifts below Molten lava bursts and overflow Rise as we wait, annihilate Burning earth pulls to the sun Rise as we wait, obliterate Burning earth pulls to the sun Three days of dakness in 2012

Mega cities still blaze in the night Burning the ashes they choke From the earth the magma will rise Enveloped in poisonus smoke so the meaning of life ends in prophecy Premonitions of tragedy still no hope for humanity

Molten fire.. flies thru the sky Burning high... eclipse of the sun Blackened skies Rites of the night The days in darkness in 2012
