

## Time Is Coming

### Testament

Yeah! The way I feel, seems to me to be so real  
So sick and tired you know just how I feel  
Cops they dress in black, they bid their lives  
The bribes they stack, so sick and tired  
Of the same old this and that  
The time is coming, it's too soon I can't quite tell  
I don't know, I think my world has gone to hell  
The time is coming, life it spins just like a wheel  
I dont know, that's the way that it makes me feel!

The man I most resent  
You might know him through the goverment  
He'll tax our lives the money's spent  
He's just the president!!!  
The land of liberty for all mankind and all to see  
What's the use, laws a conspirasy  
The time is coming, it's too soon I can't quite tell  
I don't know, I think my world has gone to hell  
The time is coming, life it spins just like a wheel  
I dont know, that's the way that it makes me feel!

Searching for answers to make life complete  
No need to searc for more questions  
There for you to see!

The wars that we must fight  
You dodge the draft before you drive  
So sick and tired, why can't they realise  
The rights they sympathise  
So sick and tried, why can't we live our lives  
The time is coming, it's too soon I can't quite tell  
I don't know, I think my world has gone to hell  
The time is coming, life it spins just like a wheel  
I dont know, that's the way that it makes me feel!
