

## Under Your Skin

Texas

Me and the snow vines quiet light  
Very overlaid and seen  
I watch them falling from this category  
But that's the risk I take  
But that's the risk I take

You said we're meant to be together  
You left with someone I know  
Took one bite straight from the apple  
And now my love has flown  
Well you said you wished you knew me  
You can't have everything  
For I knew I wouldn't know you  
But I got under your skin

And the stars are falling cold  
I smell the hail and snow  
Turning cold inside his locks of hair  
But that's the risk I take  
But that's the risk I take

You said we're meant to be together  
You left with someone I know  
Took one bite straight from the apple  
And now my love has flown  
Well you said you wished you knew me  
You can't have everything  
For I knew I wouldn't know you  
But I got under your skin

You said we're meant to be together  
You left with someone I know  
Took one bite straight from the apple  
And now my love has flown  
Well you said you wished you knew me  
You can't have everything  
For I knew I wouldn't know you  
But I got under your skin

But I got under your skin  
But I got under your skin
