

Won't Let You Down

Texas

You know I can stay
To see you that way
A life don't mean nothing at all
If you don't stay
It's clear I was wrong
So decide what to do
Not sure if you care anymore
Now it's all up to you

Fallen out of bus when I see you
You can hardly wake up when you need to
Maybe it's just a time you just have to face today

And I, I won't let you down
And I, I won't let you down

You're alone every night
Trying to hide all your lies
Twisting 'em up like little voice
While you're dying inside
You gave up your friends
The thing that you'd be set free
But now you can take a step forward
And put your trust in me

Fallen out of bus when I see you
You can hardly get up when you need to
Maybe it's just a time you just have to face today

And I, I won't let you down
And I, I won't let you down
And I, I won't let you down
And I, I won't let you down

Fallen out of bus when I see you
You can hardly get up when you need to
Maybe it's just a time you just have to face today

And I, I won't let you down
And I, I won't let you down
And I, I won't let you down
And I, I won't let you down
