

Touching The Absolute

Textures

Genetic code broken
Alpha and omega
Mathematical approach
Where does the end begin?

Code of life cycle
I am breathing
Swallow sins like the wind
Breathes yours

Attraction, reaction, the pace is fast
Fast enough to cross the fine line
Of what's there to understand

Cruel but righteous, incomprehensible
The everlasting search for answers

Momentum, the greatest symphony ever written
Unsurpassed sculpture of breathtaking beauty
Source of extreme fear, pain and passion
Undeniable mastership
Mother nature

Womb of all, tomb of all
Paragon landscape, grim parricidal entities
Relegation of a species, degradation of a precious gift
Our destiny is just a futile part of the master plan

Surely there'll be a revelation
Surely a new awareness will form
Lack of intervention will cause failing all the same
Time for change

Do any of us realize
The perspective of our lives ahead ?
Huge distances to overcome
Not aware of all the answers to let go
Just let go

Shedding this skin
A shadow remains
To be reborn again
Out of the ashes
Stretching out to cover the world

Denying gravity
Applying cavity
It makes no difference at all

To slide between the rocks of time
To imagine the snake you were
To live in the perfect storm
And remember who you were
