

Planet X

Thaurorod

I can't take my eyes off the sky
What is in my eyes?
Closer again
Soon as the world is full of fear
And nothing can be done
So questions come but...

No one knows
What will he waiting when the moment is here
Existence of man
On the edge we stand

Planet X colliding with our world
It all seems so unreal
Anunnaki enslaves human race
With might against fear?
All that we have known at the dawn of time
Will prove false today
But are we prepared for
Forthcoming ancestors of man?

Now fires burning in the night
Day of doom arrived
Mayhem of life

Still can't believe what s in my eyes
From Sumerian time
Those myths alive

And now it's time
The crucial moment
And the answers will come
I let my hope go
Armageddon come

Planet X colliding with our world
It all seems so unreal
Anunnaki enslaves human race
With might against fear?
All that we have known at the dawn of time
Will prove false today
But are we prepared for
Forthcoming ancestors of man?

Oh now I see the human race slain
Massive power annihilate
Will the day come to pass
From the ashes ascends the new world?

Planet X colliding with our world
It all seems so unreal
Anunnaki enslaves human race
With might against fear?
All that we have known at the dawn of time
Will prove false today
But are we prepared for
Forthcoming ancestors of man?

Now it's...
Now it's...
Now it s...
Time
