In The City In The Rain

In the city in the rain you've got a beautiful face In the city in the rain you vanish without a trace In the city in the rain you've got mysterious ways In the city in the rain I'm gonna spend all my days

I think I'm gonna dance All night long I think I'm gonna dance Till the moon goes down

In the city in the rain, inside a smoky cafe In the city in the rain you tell me that you'll stay In the city in the rain you suddenly slip away In the city in the rain I'm gonna spend all my days

I think I'm gonna dance All night long I think I'm gonna dance Till the moon goes down

In the city in the rain I hear the screaming of tires In the city in the rain I'm setting myself on fire In the city in the rain among the beautiful lights In the city in the rain I think I'll dance all night

I think I'm gonna dance All night long I think I'm gonna dance Till the moon goes down

The 6ths
