

## Save Your Breath

The 88

Let me outside so I can breathe  
I'm already flesh and blood  
At least that's what I think

Hand me your card and go sit still  
You don't really wanna call  
I bet you never will

And if you stray you wont get far  
You get reeled in politely  
And if you stay you learn to crawl  
You won't get hated nightly anymore

And we're waiting for the first time  
And we're hoping for the best  
We appreciate your kindness  
We love you all to death  
But you should probably save your breath

Let me back out so I can leave  
I don't want this anymore  
There's nothing up my sleeve

And if you stray you won't get far  
You get reeled in politely  
And if you stay you learn to crawl  
You won't get hated nightly anymore

And we're waiting for the first time  
And we're hoping for the best  
We appreciate your kindness  
We love you all to death  
But you should probably save your breath

Roll on chasing dreams  
Don't take me from this song  
I ought to be gone
