## **Save Your Breath**

Let me outside so I can breathe I'm already flesh and blood At least that's what I think

Hand me your card and go sit still You don't really wanna call I bet you never will

And if you stray you wont get far You get reeled in politely And if you stay you learn to crawl You won't get hated nightly anymore

And we're waiting for the first time And we're hoping for the best We appreciate your kindness We love you all to death But you should probably save your breath

Let me back out so I can leave I don't want this anymore There's nothing up my sleeve

And if you stray you won't get far You get reeled in politely And if you stay you learn to crawl You won't get hated nightly anymore

And we're waiting for the first time And we're hoping for the best We appreciate your kindness We love you all to death But you should probably save your breath

Roll on chasing dreams Don't take me from this song I ought to be gone
