

## Erased

## The Absence

Now what ever your name is  
Get ready for the big surprise  
A world of lies, right before your eyes  
The never ending climb into the red sky  
There will be no future for us to see  
Done in by the essence of they're greed

Open your mind and you will see  
Start the reactor, you are the key  
Open your mind and you will see

The lifetime of your memories

Now you got what you wanted  
So give those people air  
Ignite from this waking dream  
Instilled in the infinite will to breathe  
Here lies the truth you can't deny  
Swallow the pill or  
You will be lobotomized

Open your mind and you will see  
Start the reactor, you are the key  
Open your mind and you will see

The lifetime of your memories

You are not you  
You are what they made you to be  
Drained and erased of all memory

Open your mind and you will see  
Start the reactor, you are the key

Open your mind and you will see  
The lifetime of your memories

I'll erase your ass
