

We all bleed the same inferno  
Devouring like a welcome burn  
And a common rage while most break  
We dive right down the long road  
Of labor and hate

When we all speak  
In the same distorted speech  
The world will burn

Holocaust of fire  
You are the maelstrom in flight  
The rising flames that consume us whole  
Calling out to us from below

Come down and join us in the glow  
Born with a force unbreakable  
Engulfed in warfare where the welfare keeps  
Where I will live and die, maelstrom complete

When we all speak  
In the same distorted speech  
The world will burn

Holocaust of fire  
You are the maelstrom in flight  
The rising flames that consume us whole  
Calling out to us from below

Holocaust of fire  
You are the maelstrom in flight  
The rising flames that consume us whole  
Calling out to us from below

Now we all speak  
In the same distorted speech

Holocaust of fire  
You are the maelstrom in flight  
The rising flames that consume us whole  
Calling out to us from below

Calling out to us from below  
Calling from below
