

California

The Adicts

California sun
Shining through the window
Beating up and down
Like a yellow yo-yo
It's just the sun

California

Annie's got a gun
She knows how to use it
Points it at the sun
It's a California shoot out
She's got a gun

California

California Sunset
Orange skies by day
California dreaming
The California way
Smoking another stranger
Lying by the pool
Dying to be near you
O' we look so cool
Yes we do

California
