

Beautiful Love

The Afters

Far away, I feel your beating heart
All alone, beneath the crystal stars
I'm staring into space, what a lonely face
I'll try to find my place with you

What a beautiful smile
Can I stay for a while?
On this beautiful night
We'll make everything right
My beautiful love, My beautiful love

Larger than the moon, my love for you
Worlds collide, as heaven pulls us through
The secret of the world is written in the stars
I'm carrying your heart in mine

What a beautiful smile
Can I stay for a while?
On this beautiful night
We'll make everything right
My beautiful love

Maybe a greater thing will happen
Maybe all will see
Maybe our love will catch like fire
As it burns through me
(3x)

What a beautiful smile
Can I stay for a while?
On this beautiful night
We'll make everything right

What a beautiful smile
Can I stay for a while?
On this beautiful night
We'll make everything right

My beautiful
La la la la love
La la la la love

My beautiful
La la la la love
La la la la love

My beautiful love
