Beautiful Love

The Afters

Far away, I feel your beating heart All alone, beneath the crystal stars I'm staring into space, what a lonely face I'll try to find my place with you

What a beautiful smile Can I stay for a while? On this beautiful night We'll make everything right My beautiful love, My beautiful love

Larger than the moon, my love for you Worlds collide, as heaven pulls us through The secret of the world is written in the stars I'm carrying your heart in mine

What a beautiful smile Can I stay for a while? On this beautiful night We'll make everything right My beautiful love

Maybe a greater thing will happen Maybe all will see Maybe our love will catch like fire As it burns through me (3x)

What a beautiful smile Can I stay for a while? On this beautiful night We'll make everything right

What a beautiful smile Can I stay for a while? On this beautiful night We'll make everything right

My beautiful La la la la love La la la la love

My beautiful La la la la love La la la la love

My beautiful love
