

I came into this world to find a reason to live
I came with nothing to give
Nothing I could offer, nothing I could ever do
Before you set the stars up in the sky
You came and took me aside
You told me I was part of the plan
You told me I was yours

Will you tell me what this life is all about
Will you show me how to make my time here count
Will lead the way on, to the other side
Because I want to feel alive

If I could only see right to the end
I'd know just where to begin
I could put together all the little pieces
You carry the world, You hold it in your hands
It's all a part of your plan
Show me how to love, won't you help me find my way to you

Will you tell me what this life is all about
Will you show me how to make my time here count
Will lead the way on, to the other side
Because I want to feel alive

There's a place for us
The perfect place for us
