

## MySpace Girl

The Afters

I saw you once, it was enough  
You asked me what I wanted, I want you  
But I replied, I'll have some fries  
So mesmerized, my heart was over driving through

I saw your name and unashamed  
I searched within 500 miles to find  
Any clue just as to who I've fallen for  
Cause you've got me and I've got time

I saw your picture on Myspace  
Maybe someday we can turn it into ourspace baby  
I don't care how long it takes  
I'm saving space in my top 8 for you

The second time you were so nice  
I loved the way told me to enjoy my day  
But I know what you meant to say instead  
Was really that you wanted us to run away

I said let's go, I'll pack my clothes  
Just promise me you'll wear that purple dress you have  
You look so cute when you're confused  
You backed away and asked me how I new about that

I know you're scared  
I know our love is crazy  
And I'm so crazy  
You make me crazy  
For you
