

# Fire Girl

The Aggrolites

I could feel your fire down on the dance floor darling And I know that I've been needing you around So don't make a sound now girl, cause I feel your flame on me And it feels so good, cause I could feel your warmth

Give a little try now girl Try to understand I ain't no fool in love I just want to be your man

Come a little closer now You know you should girl You won't need nothing else I could do you some good

(Chorus) Ohh, you catch me a fire girl You catch me a fire girl

And in that fire there's a flame that dances the whole night through I know that flame won't burn out, as long as I'm with you So come on baby, wear this ring, don't you worry about a thing Because I want your fire to light up my future

Try a little tenderness Take me by the hand You don't have to change Just make me a better man

Come on make that fire light shine Shine upon my soul You let that love wood burn So now you're in control
