```
The futureæd deserted waiting there for you and me
No past is going to stop us blowing down this road apiece
Why weæ□³e come too far, too far to turn back now
We can \mathbb{E}^{\circ} just throw it all away when something good goes wrong, oh n
Nothing has been written which says which way we have to go
I x \square + not looking for commitment written in stone
No everlasting promise no no
Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run, run its course
Weæ□³e stood this ground too long thereæ□⁻ miles to make up
Oh itæ□⁻ way past the time we found out if weæ□®e truly good enough
Thereæd no truth like the truth you dare to let yourself see
Better face it now there is nothing to fear
Everything to gain right in here
Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run
Let the river run
Run its course
Let the river
Let the river run
Let the water
Let the water fall
Flow down off the mountain
Into the sea
Let the river run
Let the river run
Let the water fall
Let the river run
```

Let the water fall
