

## Eastern Glow

The Album Leaf

One by one  
We force ourselves  
Turn it on  
It comes in waves

Try to find  
Maybe this time  
Don't turn your head  
it's easy to forget how we were

Once inside  
We've made it here  
We struggle with the lights  
They never go away

What have we learned  
It's the same old things  
That drive us here  
And never go away  
We are changed

Through the tides  
Make your way  
You'll find the time  
A comfort inside

Here I wait  
In the safe place  
Where we were so many years ago  
So many years ago

One by one  
We close our eyes  
And turn to that place  
As a thousand nights go by

One by one  
We close our eyes  
And turn to that place  
And a thousand nights went by
