

## Enhancing Enigma

### The Alchemist

A captive soul returns  
Limited materialistic boundaries.  
Repeating the progress of leaving  
as previous knowledge dissolved long ago.  
Bewildered by totems in nature  
we quest universe reflection, but

When mind potentialities exhaust  
the answers remain untapped.  
Homosapiens terrorize one another  
Conforming like drones  
Homosapiens, molesters of nature  
Homosapiens, parasite of the Earth

Concepts of existence astonish,  
reality resides within myself.  
Significance is questionable  
We're less to the universe  
than amoeba to the oceans

A mass of molecules and atoms  
united to my consciousness  
Ending in physical erosion  
Repeating the cyclic process

Is this concept mirrored within myself?
