

# Not The Only One

The Apers

Time goes fast. Out of control  
Get struck behind before you know

It's all gone.yeah. It's all over  
Motion-sick and hungover  
Just open your eyes and see that

There's a whole world out there, and  
it's waiting just for you  
99% of all of us don't have a clue  
Assembly lines run day and night, so don't  
be sad and blue  
You're not alone, you're not the only one

Headlines of better life  
They drift away into the night

Memories. they fade away  
All colours fade and turn to grey  
But the future looks bright because

There's a whole world out there, and  
it's waiting just for you  
99% of all of us don't have a clue  
Assembly lines run day and night, so don't  
be sad and blue  
You're not alone, you're not the only one  
You're not alone, you're not the only one

I've heard then say  
Life is great  
When you're 12 or 88  
If that's true  
Does that mean  
Life's a hellride in between?  
I don't know  
I don't care  
Guess I couldn't care less  
I look up  
To the sky  
And take it one step at a time

You're not alone, you're not the only one  
You're not alone, you're not the only one  
You're not alone, you're not the only one
