

Shine A Light

The Apples In Stereo

Let's go outside, we'll go for a ride
for a day or two.
Let's go outside, the air is open wide
and the weather's bright for you.

Something I would do
is shine a light on you
and the light would shine
baby, all the time.

We look to the sky, an ocean of design,
and find a lucky star.
Look to the sky and baby get a notion
of the ocean that you are.

Something I would do
is shine a light on you
and the light would shine
baby, all the time.

Jupiter, shine on her:
Get to know her could take some time.
And I know it could take some time, man
Jupiter, my mind's on her:
And I know it could take some time, yeah.
And I know I could make some time, man.

Next time you find that you can't make
your mind up
like you ought to do
let's go outside, open up your eyes
and let the sun shine into you.

Something I would do
is shine a light on you
and the light would shine
baby, all the time.
