

A Dream For Us

The Appleseed Cast

'Cause what I feel inside that I don't want to hide
It's you that got to me and it's what I want to sing
'Cause I've got a dream for us running through my mind
Sitting on the beach looking at the sea

And we're old and tired and time has made us smile now
As we go on, can't do a thing, people and their pain
And we're not the only ones, there's hundreds on the shore
Looking at the sea, but it's just you and me

If the day never comes, I'll sink beneath the tide
Will you still be with me or disappear?
