

Worms Make Dirt

The Aquabats

-Mommy?
-Yes Son?
-Where does dirt come from?
-Dirt comes from: The Worms.
-Wow! Awesome!
There is a chipmunk
At the center of the earth
And in his big oven
He bakes his own desserts
He warms the ocean
And from that, life springs forth
Little organisms building trash around the clock
Compost heaps
Or melting pots
For Farmer John's
Smoked Sausage stocks
Worms make the dirt
And the dirt makes the earth
And all of the roots have a place to sleep now
All the chanuks have squash to eat now
Worms make the dirt
And the dirt makes the earth
And people hold hands and feel terrific
Food comes from dirt
It's scientific
Yeah! Wow!
There's so much to learn!
The Sun came from a cave
And it made the clouds go by
(Hi!)
The clouds had a conference
And rain fell from the sky
(Wow!)
Worms got thirsty
From eating too much dirt
(Yeah!)
They came up through the ground
And got eaten by the birds
(Huh?)
Some worms escaped
With their lives
(Oh boy!)
They excreted soil
Yeah! Yeah! Yeah!
Worms make the dirt
And the dirt makes the earth
And all of the roots have a place to sleep now
All the chanuks have squash to eat now
Worms make the dirt
And the dirt makes the earth
And people hold hands and feel terrific
Food comes from dirt
It's scientific
THE MIRACLE OF LIFE IS AWESOME!
AWESOME!
Worms make dirt
