

# I Am the Mountain

## The Asteroids Galaxy Tour

Anybody out there?  
Anybody anywhere, I need a good friend tonight.  
I wanna get heated, I wanna get treated, need a good place to hide.  
I won't get no sleep, now that you're with me  
I am the mountain.  
I won't tell no lies, you've been hypnotized  
I am the mountain  
Hey! C'mon, wanna turn you on, feel so much better,  
You know, you know, I want you now  
Say haute couture, I will light the fire in stormy weather,  
You know, you know, that I want you now.  
Hey I'm feeling silly so makes me wanna live,  
I've been picking roses from the day the oceans split  
Good times bad times come and go, but I'm riding on the storm  
I've been chasing unicorns since the day that I was born,  
Yeah I've been chasing unicorns since the day that I was born.  
Show that you want me, I need you to feel me, a little little get away  
Shoot a bullet right through me, a bullet right through me, make the pain go away,  
I won't get no sleep, now that you're with me  
I am the mountain.  
I won't tell no lies, you've been hypnotized  
I am the mountain  
Say hey! C'mon, wanna turn you on, feel so much better,  
You know, you know, I want you now  
I say haute couture, I can light the fire in stormy weather,  
You know, you know, that I want you now.  
Hey I'm feeling silly so makes me wanna live,  
I've been picking roses from the day the oceans split  
Good times bad times come and go, but I'm riding on the storm,  
I've been chasing unicorns since the day that I was born,  
Yeah I've been chasing unicorns since the day that I was born.  
We gonna die while breathin', been down this road before  
We gonna die for the feelin', it's the way we roll,  
We gonna die while dreamin', naked on the shore,  
We gonna keep on reachin', out for more
