

# Inspiration

## The Axis of Awesome

So a lot of people ask us where our inspiration comes from  
I guess a lot of it comes from things around us like spoiled milk and birdplanes  
We look to there bands for inspiration, the sort of bands that have influenced us  
and they way they have written their songs,  
And bands have taken drugs to help them to write songs  
Yeah most famously The Beatles with Lucy In The Sky With Diamonds  
and Bob Marley with the complete works of Bob Marley  
Hannah Montana with Can I Please Have Some More Drugs Please  
Anyway we dropped some acid and came up with this.

(SCREAMS and Random Piano Keys)

Don't do drugs.
