A Fever

The Badlees

(Naydock, Palladino) With flu I dream of you In light as blue as neon when it's blue Past visions of rolling hills In movie stills A panoramic stew Above the scientific Element, content We spy the view (Chorus) A fever's brought me close to you In ways we can not be A fever's brought me close to you In ways we can not be Even in memory Sublime In double time We climb to where convention swerves and leans 'Couple-a-beers In a tent by sears By a giant plastic nativity scene In color dogs endure I'm sure The light you've given me is green (Chorus) I mouth petitions Oh those soft renditions Of the ones I've come to lean on For you Again, in blue And straightening a photographic dawn May I experience The sense of Where I dream you when I'm gone (Chorus 2x)
