

# Night Gone Wasted

The Band Perry

You can find my face where the moon light lingers  
Cause it's Friday night and it's as hot as ever  
My heart is banging to the beat of the band  
Me and my pals we got scars from the week  
But now we're all getting loud and we're moving our feet  
As we do our best to let things get out of hand

It's a night gone wasted again  
I'm making up with my enemies and loving my best friends  
Well well well  
It's the best medication to make the whole wide world go 'round  
It's a night gone wasted  
Oh yeah

All of our eyes they've got rings of fire  
Cause we're burning time like there's no tomorrow  
It's gonna take a while to blow off a week's worth of steam  
Tell your sweet mama not to worry her pretty little head  
I'll have you home soon and then I'll tuck you in bed  
But until then let's do our best to get out of hand

Man oh man

It's a night gone wasted again  
I'm making up with my enemies and loving my best friends  
Well well well  
It's the best medication to make the whole wide world go 'round  
It's a night gone wasted  
Oh yeah

Oh what a riot it's been  
I'm gonna save up some more money to spend on another night

Well well well  
It's the best medication to make the whole wide world go 'round  
It's a night gone wasted tonight  
Alright  
We're going out tonight  
Again

Oh yeah
