

# Keep The Door Open

## The Basics

Woman can you tell me  
What it is to love someone  
Without the getting older  
I'd be wiser than I was  
Every time I get close to you  
I end up right back at the start  
So woman can you tell me  
What it is to love and be loved by someone

Woman can you hear me  
'Cause you know the less I know  
This pain you got me goin' through  
Is like the ghost of what could have been  
And I look out for a sign  
Something to tell me I'm getting through to you  
But you close your eyes and woman  
I cant open them for you

So it's time I went away  
It's time I gave you space  
It's time I gave myself the chance  
to find some piece of mind some day

I'll keep the door open for you  
If you ever find a way to make it back to me some day  
I'll keep the door open for you  
'Cause a fire burns inside, and a love I cannot hide  
I'll keep the door open for you

Woman can I ask you  
Do you regret the things you said  
I could never leave you nor forsake you  
And there's no bitterness from my end  
But can you acknowledge one thing before I go  
There's something special in what we had  
I know it's hard to see it now woman  
But it'll work out in the end

So it's time I went away  
It's time I gave you space  
It's time I gave myself the chance  
to find some piece of mind some day

I'll keep the door open for you  
If you ever find a way to make it back to me some day  
I'll keep the door open for you  
'Cause a fire burns inside, and a love I cannot hide  
I'll keep the door open for you  
If you ever find a way to make it back to me some day  
I'll keep the door open for you
