

# Always

## The Bigger Lights

As we stood atop your best friend's porch  
The wind cut through our teeth  
I glued my feet in front of you  
Cause I swore I'd never leave

And then it all falls down  
Around me

As I watch you walk away from me  
The street lights flicker then  
Your shadow fades into the night  
And my heart starts craving in

Gotta find a way  
To get you back again

When the fire 'round our house is blinding  
And the road to better days is far away  
If the words can't be enough to say "We'll be okay"  
I will be here now and always to stay

It's a long way back from where we are  
To where we used to be  
When I'm haunted by the ghost of you  
In a place that never sleeps

Gotta find the words  
To get you back to me

When the fire 'round our house is blinding  
And the road to better days is far away  
If the words can't be enough to say "We'll be okay"  
I will be here now and always to stay

If you come back home  
You'll never be alone  
If you come back home  
You'll never be alone  
If you bring yourself  
To live for someone else  
Then you'll know

When the fire 'round our house is blinding  
And the road to better days is far away  
If the words can't be enough to say "We'll be okay"  
I will be here now and always to stay  
I will be here now and always to stay  
I will be here now and always to stay  
I will be here now and always to stay.
