

I Think I Like You

The Black Box Revelation

Did you ever know love
cause I wanna be with you
Did you ever know love
cause I want to be with you
Did you ever see a light inside your mind
did you ever stop to look while it makes you blind
I should feel the love from the skin to my bones
It's a feeling that's making me high!

There's something and it makes me smile
I think I like you
there's something burning in my mind, yeah
I think I like you

Did you ever think twice
cause I wanna be with you
No doubt from my side
cause I wanna be with you
Did you ever make love, was I on your mind
did you ever get enough, were you satisfied
I should feel the love from the skin to my bones
It's a feeling that is making me high

There's something and it makes me smile
I think I like you
there's something burning in my mind, yeah
I think I like you

I want you
to call me
and don't you forget
I wait
and wonder
so don't waste my time

There's something and it makes me smile
I think I like you
there's something burning in my mind, yeah
I think I like you
