Spite Suicide

The Black Dahlia Murder

Terror is thy name! Burning thine bridge And death the same

A year to drain my innocence And course it through your blackened veins

Oh, Demoness! (Oh, Demoness!) What has our daughter become? Trash for the maggots to eat? What color eyes should be staring at me in my dreams?

Abomination born in this union of hate (Killed in the name of the free) And of our son? To the sickle he clung A featureless face for your nightmarish dreams

Dilate - extract Dilate - and bury it all Mother, vampiric mistress or night-fed blood Who pets her child's head from a grave (Demon!) Enchantress of evil profound Dead and nameless, dead (A noose to choke the memories from me)

Addicted to those forbidden hands Thrust deep inside her helpless hull

[solo]

(SCRAPE!) Scrape it all away Vacuum these pictures from my brain Scrape it all away

How I shall laugh once you have died! How I will sleep once you've been destroyed! (Destroyed, destroyed, destroyed)

Dilate - extract Dilate - and bury it dead

Mother, vampiric mistress or night-fed blood Who pets her child's head from a grave (Demon!) Enchantress of evil profound Dead and nameless, dead (A noose to choke the memories from me)

DEAD!
