

# All Hands Against His Own

The Black Keys

He found all hands against his own  
Found all eyes were looking down  
And the sun had left and gone  
All his friends could not be found

Don't talk about, don't think about love  
She's not the one you're dreaming of  
Don't talk about it, can't live without it

You say you're alone  
He found all hands against his own

He found the sky, it turned to gray  
And the clouds start rolling in  
Got no use for what they say  
Got no use for where they've been

Don't talk about, don't think about love  
She's not the one you're dreaming of  
Don't think about it, can't live without it

You say you're alone  
He found all hands against his own  
You say you're alone  
He found all hands against his own

You say you're alone  
He found all hands against his own  
You say you're alone  
He found all hands against his own

He found all hands against his own  
And no light from up above  
Just a dark and lonely road  
He found all hands against his own
