

Every Little Thing

The Black Keys

When you look into the mirror
Do your secrets start to show?
You been holding onto something that you wish you didn't know
Every little thing that you do
Is always gonna come back to you

So put your hand into the hair of someone that you love
Pretty face, hand her everything you're dreaming of
Every little thing that you do
Is always gonna come back to you

Hold on
Count your blessings
It moves on and it ain't always smooth
Every little thing that you do
Is always gonna come back to you

Build a house, fill it up
Make your part, making love
Move it right, moving wrong
Living life like a song
Every little thing that you do
Is always gonna come back to you

Hold on
Count your blessings
It rolls on and it ain't always smooth
Every little thing that you do
Is always gonna come back to you

Oh back to you
Back to you
