

Sit Around and Miss You

The Black Keys

We used to play pretend
You and me thought it might never end
Now I wonder where you've been
I sit around and miss you

The fireflies would glow
Turning all the darkness to a show
Oh what made us let it go?
I sit around and miss you

I miss you awful bad now
I miss the friend I had now
I miss you...

Now when it's getting dark
I walk beside our ghosts out in the park
Oh we sure did leave our mark
I sit around and miss you

I miss you awful bad now
I miss the friend I had now
I miss you...
I sit around and miss you
